7. Work Assignments Continue On-water skimming operations in heaviest areas of oil, primarily close, but a safe distance away, to the discharge source as possible without interfering with source control operations. Set up containment boom in a U shape to capture oil discharging from the source. Position the Bunkering barge at the vortex skimmer location (which is at the bottom of the U) for storage of collected oil.					
8. Special Instructions COTP has granted over the top transfers of oil from the OSRV into the bunkering barge as long as all standard safe work practices are followed in accordance with Joe's Bunkering Service approved transfer procedures.

7. Work Assignments Maintain Preventive boom at mouth of Foggy Marsh. Line Preventive boom, on the Foggy Marsh side of the boom, with Adsorbent Sweep (Pom-Poms). Use both adsorbent pads and sweep to collect any oil that has entered the Foggy Marsh area. Environmental Tech Spec T. Hugger will advise on any areas that should not be impacted by active oil recovery and considered for follow-on evaluation of alternative methods of recovery.
